

HOW TO BE A BIG BORE

...and get away with it.

Tuck an Oselli BIG BORE engine under your bonnet and wave your friends 'goodbye' in the rear view mirror. Choose from four brand new large capacity engines, any of which will do your car a power of good – at prices to suit all pockets.

1100 – Suitable all "A" series cars under 1100 c.c. The least expensive BIG-BORE is the OE 1125, an 1100 c.c. engine of proven reliability. You get a fully balanced and Tufftrided crankshaft, rods and pistons, camshaft bearings, heavy duty main and ends, and a new primary gear complete with shims. All this fully assembled to a new cylinder block and ready for you to transfer your present head, cam etc. Price complete just £62 No exchange.

The next stage up is a complete conversion package. To the basic engine described above we add a specially designed "GT" cylinder head, road race cam, competition clutch, timing gear etc. Pre-assembled and ready to fit your present gearbox. Price £130 plus £20 deposit returnable on receipt of your old engine, whatever capacity.

1300 – Suitable all "A" series transverse engine cars 0-60 in 9.8 secs and a top speed of 97 mph! That's how a Mini Traveller fitted with an Oselli 1300 engine performed, according to a recent road test. Two units are available. OE 1126 consists of a new block, balanced and Tufftride hardened crank, balanced rods, and pistons, Stage 1 head, road/race cam etc. Pre-assembled and ready to bolt to your gearbox. Price £142 plus £20 deposit refundable on return of your old unit. And now, just announced, the 1300 GT, a competition engine with a fantastic specification. Fuller details on request. Price £200.
