

Minisprint

During the past few months MiniSprint production has been almost entirely devoted to fulfilling export orders, bringing much-needed foreign currency into the country. MiniSprint cars have been shipped to U.S.A., FRANCE, DENMARK, IRAN, MALAYA, SWEDEN, SINGAPORE, GERMANY, SWITZERLAND, HOLLAND, NEW ZEALAND AND SPAIN.

Increased production facilities now enable us to offer a limited number of MiniSprint Body units for sale on the Home Market. Several versions are available, including the very practical MiniSprint "Traveller" unit. The price of a brand new unit, completely finished and ready to accept mechanical components, is approximately £300. If you would like to build yourself a really interesting "personalised" performance car, then send 6d in stamps for further details.
